OPTIONAL EQUIPMENT

Mercedes-Benz offers innovative options that enhance your vehicle’s appearance, performance, comfort, and safety. Select from many individual options or option packages that help your Sprinter work smarter and harder for your business. See your authorized Mercedes-Benz Vans dealer for a complete list.

ENDNOTES
1. Requires the use of ultra-low-sulfur diesel fuel. Mercedes-Benz Sprinters are approved to use ULSD diesel fuel with a maximum 5% biodiesel content (all B5 blends) engines. The only approved biodiesel content is one that meets ASTM D6751 specifications and that has the residual stability necessary to prevent deposits/ corrosion-related damages to the engine (i.e. it's currently the B10-B15 standard). Please see your service center for further details.
2. Standard 2.7L 4-cylinder Diesel engine (677000064070). The Sprinter’s 2.7L 4-cylinder diesel engine is specified as the "Standard Engine" in the Sprinter's frame and is the only engine for which Sprinter manufacturers warranty applies. Electrically adjustable mirrors, the cruise system, and the lane assistance system for the Sprinter are optional equipment. The vehicle shown is the base model. See your authorized dealer for further details.
3. Includes COLLISION PREVENTION ASSIST that may not be sufficient to avoid an accident. It does not react to certain stationary objects, nor recognize or predict the curvature and/or lane layout of the road or every movement of other vehicles ahead. It is the driver's responsibility at all times to be attentive to traffic and road conditions, and to provide the steering, braking, and other driving inputs necessary to retain control of the vehicle. Drivers are cautioned not to wait for the system's alerts before braking, as that may not afford sufficient time and distance to brake safely.
4. With 2.7L 4-cylinder Turbo Diesel engine.
5. The Blind Spot Sensor system assists the driver when changing lanes by alerting the driver of blind spots, thus reducing the risk of accidents. See your authorized dealer for further details.
6. Lane Keeping Assist (LKA) may not be sufficient to prevent rear-end collisions. It is not a substitute for actively checking around the vehicle for any obstacles or people. Imaging sensors may be impacted by objects and environmental conditions, and visibility may be reduced by adverse weather.
7. Roadside Assistance Program.
8. Extended Limited Warranty (ELW) not available in all states. Contact your local Mercedes-Benz Vans dealer to verify availability.
9. The Rear View Camera system is only available when your vehicle is equipped with the optional Rear View Camera system.
10. The split tailgate is available when your vehicle is equipped with the optional split tailgate.
11. Becker® is a registered trademark of Harman Becker Automotive Systems GmbH.

The 2016 Sprinter MiniBus

Simplified—and smart—financing solutions.

Through Mercedes-Benz Financial Services, we offer a variety of financing products and solutions with flexible benefits and competitive rates tailored specifically to meet the needs of your business. Whether you need a simple interest loan or a leasing solution, our dedicated commercial finance experts are ready to work for you, ensuring a first-class financing experience. See your Mercedes-Benz Vans dealer for current rates.

Extra protection for the road ahead.

All Mercedes-Benz Sprinters come standard with our 24-hour Roadside Assistance Program® and expert advice 24/7 through the Mercedes-Benz Customer Assistance Center. But we don’t stop there.

A Mercedes-Benz Extended Limited Warranty® offers the added peace of mind to drive your business even further. With protection beginning immediately after the original warranty expires, you can have your Sprinter repaired by factory-trained technicians using high-tech diagnostic equipment and completed with Genuine Mercedes-Benz Parts. Choose from 1-, 2-, and 3-year options up to 150,000 miles with no deductibles or cumbersome claims processing.

Take advantage of the money-saving value of a Prepaid Maintenance contract. Pay for maintenance in advance (rather than per visit) and help lower your total cost of ownership.

The MiniBus with maximum capabilities.

The Sprinter MiniBus is designed to provide safe and comfortable transportation—and help your bottom line as well. The standard 3-stage turbo diesel engine delivers up to 148% in fuel savings to help lower your total cost of ownership. The MiniBus also helps protect you and your passengers with class-leading safety features, including available COLLISION PREVENTION ASSIST® to help prevent rear-end collisions.

With the capability to transport up to 19 passengers, the Sprinter MiniBus is the stylish, high-performance shuttle van that makes any short trip a first-class ride. The Sprinter MiniBus features wide-38 inch outward-opening doors and low step-in heights that allow for quick and easy loading, while configurable packages let you customize seating for hotel and airport shuttles, commuters, paratransit, and more.

Mercedes-Benz Vans. Born to run.

TALL INTERIOR UNIBODY STANDING HEIGHT

OPTIONAL
V6 TURBO DIESEL ENGINE WITH 5-SPEED TRANSMISSION
MULTIFUNCTION STEERING WHEEL
HEATED STEP
REAR HEAT & AIR CONDITIONING

Safety features that can help protect you and your passengers today—and down the road.

- **Blind Spot Assist** helps the driver avoid accidents by giving visible warnings when it detects vehicles in the blind spot.
- **Collision Prevention Assist** is a radar-based proximity warning system that issues audible and visible warnings when vehicles traveling ahead come within a potentially dangerous distance. In emergency situations, boosted braking pressure assists automatically to help prevent rear-end collisions.
- **Lane Keeping Assist** provides the driver audible and visible warnings if the vehicle leaves its lane unintentionally. A camera in the windshield monitors the road ahead, detecting when you may veer away from lane markings.
- **Highbeam Assist** utilizes a camera located on the inside of the windshield to monitor traffic ahead. When activated, it controls the main headlamp beam to provide the best possible road illumination.
