Audio 10

Operating Instructions
Welcome to the world of Mercedes-Benz
First of all, familiarize yourself with your Audio 10. Read this manual, particularly the safety and warning notices, before you drive off. This will help you to obtain the maximum pleasure from your Audio 10 and avoid endangering yourself and others.
The equipment and functions of your Audio 10 may differ depending on:
• model
• order
• country specification
Mercedes-Benz is constantly updating its systems to the state of the art.
Mercedes-Benz therefore reserves the right to introduce changes in:
• design
• equipment
• technology
Therefore, the descriptions provided may occasionally differ from your device.
Please consult an authorized Mercedes-Benz Center if you have any questions.
The Operator's Manual and all supplements are an integral part of the vehicle. You should always keep them in the vehicle and pass them on to the new owner if you sell the vehicle.
The technical documentation team at Daimler AG wishes you safe and pleasant motoring.

Operating safety

**WARNING**
If you operate information systems and communication equipment integrated in the vehicle while driving, you will be distracted from traffic conditions. You could also lose control of the vehicle. There is a risk of an accident.

Only operate the equipment when the traffic situation permits. If you are not sure that this is possible, park the vehicle paying attention to traffic conditions and operate the equipment when the vehicle is stationary.

In addition, observe the legal requirements of the country in which you are currently driving.

Proper use

Audio 10 can be used to receive radio stations, to play back SD memory cards and other data carriers and to make calls via the Bluetooth® function.

Observe the requirements in the technical data for data carriers and permissible formats.

Qualified specialist workshops

A qualified specialist workshop has the necessary specialist knowledge, tools and qualifications to correctly carry out the work required on Audio 10.

An authorized Mercedes-Benz Center is a qualified specialist workshop.

Always have modifications to Audio 10 carried out at a qualified specialist workshop.

Declaration of conformity

Radio-based vehicle components

**USA only:** The wireless devices of this vehicle comply with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. These devices may not cause interference, and
2. These devices must accept any interference, including interference that may cause undesired operation of the device.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

**Canada only:** The wireless devices of this vehicle comply with Industry Canada RSS-210 standard. Operation is subject to the following two conditions:
1. These devices may not cause interference, and
2. These devices must accept any interference, including interference that may cause undesired operation of the device.

General notes

Information on the Operating Instructions

This Supplement describes Audio 10 as was available at the time of this Supplement going to print. Country-specific variations are possible.

Therefore, your Audio 10 equipment may differ from certain descriptions and illustrations. Should you have any questions concerning equipment and operation, consult any authorized Mercedes-Benz Center.
Information on copyright

Registered trademarks

Bluetooth® technology is the standard for short-range wireless data transmission of up to approximately 10 meters. Bluetooth® is a registered trademark of Bluetooth Special Interest Group (SIG) Inc.

An SD memory card is a digital storage medium. SD memory cards carry the logo displayed above. This logo is a registered trademark of SanDisk Corporation.

Cleaning

To clean, use a slightly damp cloth. The cloth must be soft and lint-free. For stubborn dirt, you can use a mild cleaning agent. In particular, never clean the display with alcohol, acid or an abrasive cleaning agent.

Equipment

With Audio 10, the following functions are available:

- playback of files stored on USB devices
- playback on external devices via the AUX jack
- connection of a personal mobile phone via Bluetooth® to call using the hands-free system
- connection and playback of your personal audio equipment via Bluetooth® (if supported by your audio device)

**Example: selecting MP3 tracks on an SD memory card**

The following example shows, step by step, how to select and play MP3 tracks which have been saved on an SD memory card.

**Initial situation:** you are listening to the radio and the SD memory card is inserted in the slot.

![SD memory card in the slot](image)

**Initial situation:** you are listening to the radio and the SD memory card is inserted in the slot.

1. **To select the menu:** repeatedly press the MEDIA button until SD is shown in the display.
2. **Press the ↓ button to jump to the menu bar.**
3. **Press the ← or → button to select the Music menu.**
4. **Press the OK button to confirm.**
   The Music menu opens. The previously played track is selected.

   ![Music menu](image)

   **To select a folder:** press the ↓ button repeatedly until the menu level with the desired folder has been reached. Audio 10 jumps one menu level each time the button is pressed.
   1. **Press the ↑ or ↓ button to select the desired folder.**
   2. **Press the OK button to confirm.**
      The folder opens and the first music track is selected.
To select a track: press the button to select a track.

Press the button to confirm. The selected track is played.

Press the button to confirm.
The selected track is played.

Overview of the multifunction steering wheel

Audio 10 switches off automatically when you remove the ignition key.

Basic functions

Switching on/off

Press the On/Off button.

Once switched on, Audio 10 calls up the most recently active function.

Audio 10 switches off automatically when you remove the ignition key.
Audio 10 switches off automatically when the condition of charge of the battery is low.

If Audio 10 is running while the ignition is switched off, it will switch off automatically after approximately one hour to preserve the vehicle battery.

### Setting the volume

- Turn the volume control during playback.

Or

- Press the + or - button on the multifunction steering wheel.

### Activating/deactivating the mute function

- Press the mute button.
  The sound from the audio source is switched on or off. When the sound has been muted, the symbol is shown in the status bar.

If you change the audio source or adjust the volume, the sound switches on again automatically.

When the mute function is active, playback from the SD memory card, USB device and BT audio is paused. When you deactivate the mute function, playback will resume from the position where it was paused.

When the TA function is activated, you hear traffic reports even when the sound is muted (> page 20).

### Adjusting the display

#### Setting the brightness

- **Brightness 3**

### To select the system menu:
- press the button and confirm with OK.

- Press the button to select Brightness and confirm with OK.

- Adjust the brightness using the or button.
  The long bar shows the current setting. The short bar shows the most recently stored brightness setting.

- Press the OK button.
  The new setting is saved and Audio 10 returns to the system menu.

### To exit the system menu:
- press the RADIO or MEDIA button.

### Switching the display on/off

- **Display Off**

- Press the button.

- Press the button to select Display Off and confirm with OK.
  The display is switched off. Audio 10 functions remain available. You continue to listen to the selected audio source.

- To switch the display on again: press OK, RADIO or MEDIA.
Adjusting the sound settings

- Press the \[\text{up} \] button.
  The display shows the current sound settings.
- Select Treble, Bass, Balance or Fader with the \[\text{up} \] or \[\text{down} \] button.
- Adjust the sound with the \[\text{left} \] or \[\text{right} \] button.
  The long bar shows the current setting. The short bar shows the most recently stored sound setting.
- To exit sound settings: press the \[\text{esc} \] button.
  Audio 10 stores the new sound settings.

Setting the language

As standard, Audio 10 uses the language set in the on-board computer. You can also set the language independently of the on-board computer.

- To select a language: use the \[\text{down} \] button to select the desired language and confirm with \(\text{ok}\).
  Audio 10 display texts are shown in the selected language.
- To exit the system menu: press the \[\text{radio} \] or \[\text{media} \] button.
  Audio 10 display texts are shown in the selected language on the on-board computer.

Resetting to factory settings

You can reset the settings of Audio 10 to the factory settings. This will delete all personal data (station memory, phone book etc.).

Reseting to factory settings is useful when you sell the vehicle, for example.

- To select the system menu: press the \[\text{sys} \] button and confirm with \(\text{ok}\).
- Use the \[\text{down} \] button to select Reset and confirm with \(\text{ok}\).
  A prompt appears in the display asking whether the data should be deleted.
- Use the \[\text{left} \] or \[\text{right} \] button to select Yes or No and confirm with \(\text{ok}\).
  If Yes has been selected, a second prompt appears in the display asking whether the data should be deleted.
To cancel the deleting process: **No**.
Audio 10 is not reset.

Or

**To delete:** select **Yes** in the display and confirm with ( 확인 )
The display briefly shows a message. Audio 10 is reset and restarted.
Selecting radio ........................................ 18

Storing stations ..................................... 18
Switching wavebands .............................. 19
Operating the radio using the multifunction steering wheel .......... 20
Traffic program priority (TA) ................. 20
Storing stations

Selecting radio

- Press the [Radio] button.
  You will hear the last station selected.

Selecting a station

Station search

- Press the [or] button briefly.
  You will hear the next receivable station.

Setting stations manually

- Press and hold the [or] button until the desired position has been reached.
  You will hear the selected station, as long as it is receivable.

Setting the frequency manually

Enter Frequency

1 0 1 . 1 MHz

- Press the [] button.
- Using the [0] to [9] number keys, enter the desired frequency.

Or

- To select the radio menu: press the [button, select Radio using the [ or ] buttons and confirm by pressing the [ ] button.
  The Enter Frequency menu item is selected.
- Press the [ ] button.
- Using the [0] to [9] number keys, enter the desired frequency.

You can only enter frequencies which lie within the selected waveband (> page 19).

Storing stations

Storing stations manually

<table>
<thead>
<tr>
<th>[1A]</th>
<th>FM 92.2 MHz</th>
<th>[ ]</th>
</tr>
</thead>
<tbody>
<tr>
<td>[5]</td>
<td>SWR 3 BW</td>
<td></td>
</tr>
</tbody>
</table>

Radio Presets Info FM

You can save the current station.

- Press and hold any of the [0] to [9] number keys until the display shows the number you pressed in front of the transmitter frequency or the station name.
  The station is stored under the selected preset.

Previously stored stations from this waveband will be lost.

Storing stations automatically

You can automatically store 10 receivable stations in the waveband selected to presets. The order is determined by reception quality.

To select the preset menu: press the [ ] button, select Presets using the [ or ] buttons and confirm by pressing the [ ] button.
To select Autostore: press the \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) or \( \textcolor{red}{\text{\textbf{\text{\text{\textbullet}}} \text{Autostore}}} \) button to select Autostore and confirm by pressing the \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) button. Audio 10 searches for the 10 stations with the strongest signal and stores them.

To cancel storage: during storage, press the \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) button.

To exit the preset menu: using the \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) button, select one of the stored stations and confirm by pressing the \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) button.

Audio 10 searches for the 10 stations with the strongest signal and stores them.

To exit the preset menu: using the \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) button, select one of the stored stations and confirm by pressing the \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) button.

Press the \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) button to select the desired waveband.

To select the preset menu: press the \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) button, select Presets using the \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) or \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) buttons and confirm by pressing the \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) button. The display shows a list of the stored stations.

To select a station: using the \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) or \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) buttons, select a station and confirm by pressing the \( \textcolor{red}{\text{\textbf{\text{\textbullet}}} \text{Autostore}} \) button. You will hear the station stored in the selected preset, if it is receivable.

Switching wavebands

Audio 10 can receive the following wavebands:

<table>
<thead>
<tr>
<th>Waveband</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>FM (VHF)</td>
<td>87.7 – 107.9 MHz</td>
</tr>
<tr>
<td>MW (medium wave)</td>
<td>530 – 1710 kHz</td>
</tr>
</tbody>
</table>
Operating the radio using the multifunction steering wheel

You can call up saved stations using the multifunction steering wheel.

1. Waveband
2. Station

▶ Press the RADIO button. Radio mode is selected.
▶ Select Radio with the or button on the multifunction steering wheel. The on-board computer display shows the waveband and the station name/frequency of the selected station.
▶ Use the or button on the multifunction steering wheel to call up the previous or next stored station.

Traffic program priority (TA)

TA function

If you are listening to a station without traffic reports or another audio source, Audio 10 can switch to a station with traffic reports, for the duration of one traffic report. This TA function is also possible when the system is muted.

Traffic program priority is only available in the FM waveband. Stations which broadcast traffic announcements are marked TA in the status bar.

Telephone conversations and navigation announcements are not interrupted.

Activating/deactivating the TA function

▶ Press and hold the mute button until the display shows TA in the status bar.

Or

▶ To select the radio menu: press the button, select Radio using the or buttons and confirm by pressing the button.
▶ Using the button, select Traffic Information (TA).
▶ Using the button, switch the TA function on or off. A tick in front of Traffic Information (TA) shows that the TA function is switched on.

▶ To exit the radio menu: press the button.

If the TA function is switched on, you will see the TA symbol in the status bar.

You can also activate/deactivate the TA function in the SD, USB, AUX and BT audio menus.

Adjusting the volume of traffic reports

▶ Turn the volume control right or left during a traffic report.

This setting also applies to the traffic reports to follow.

Interrupting a traffic report

▶ Briefly press any button during a traffic report, except the button.
The next traffic report can be heard again.

WARNING
Handling discs while driving may distract you from traffic conditions. You could also lose control of the vehicle. There is a risk of an accident.
Handle discs only when the vehicle is stationary.

Inserting/removing an SD memory card

Inserting an SD memory card

Insert the SD memory card into the SD slot with the contacts at the front and facing downwards.
Audio 10 automatically activates the SD function and loads the files. The display shows Reading Memory Card...

If Audio 10 cannot find any readable data on the SD card, the display shows the message No Playable Files. Information on readable file formats can be found in the technical data (page 48).

Ejecting an SD memory card

Press the SD memory card.
Audio 10 ejects the SD card.
Remove the SD memory card.

Connecting a USB device

The port for USB devices is located in the stowage compartment on the driver's side of the instrument panel.

Connect the USB device to the USB port in the correct position.
Audio 10 automatically activates the USB function and loads the files. The display shows Reading USB device...

If Audio 10 cannot find any readable data on the USB device, the display shows the message No Playable Files. Information on readable file formats can be found in the technical data (page 48).

Due to the wide range of USB devices available on the market, playback cannot be guaranteed for all USB device brands. Information about suitable USB devices can be obtained from an authorized Sprinter Dealer.

Selecting the SD/USB function

Press the \(\text{Media} \) button repeatedly until the display shows SD/USB.
Or
Insert the SD card (page 24)/USB device (page 24).
Playback starts.

If you are using one of the audio sources SD, USB, AUX or BT Audio, you can also call up the SD/USB function via the media menu.

To select the Media menu: press the \(\text{Media} \) button, select Media using
Selecting a track

Selecting a track by skipping to a track

- Press the or button briefly. Audio 10 plays back the previous or next track.
- Press and hold the or button. The current track is rewound or fast-forwarded.

The following principles apply to the skip back function:

- if the track has been playing for less than 8 seconds, playback moves back to the start of the previous track.
- if the track has been playing for more than 8 seconds, playback moves back to the start of the current track.

If you have selected random playback (> page 26), a random selection follows as the next track.

Selecting a track by track number

- Press the button.
- Enter the desired track number using the number keys. Audio 10 plays the selected track.

You can only enter numbers of tracks which are in the folder currently being played.

Changing folders

- To select the music menu: press the button.
- To select a folder: press the , and buttons to select a folder and confirm with.
- To exit the music menu: press the button to select a track in the folder and confirm with.

You can navigate through the folder structure of the SD memory card/USB device as follows:
### Calling up information on the currently played track

<table>

</tbody>
</table>

#### Selecting track playback options

You may select from the following track playback options:

- **Normal track sequence**: You hear the tracks in the same order as they are stored on the SD memory card/USB device.
- **Random tracks**: All the tracks on the SD memory card/USB device are played in a random order.
- **Random folder**: All tracks in the selected folder and sub-folders are played in random order.

**Track Sequence, Random Tracks** or **Random Folder** and confirm with OK. You will hear the tracks in the desired playback option.

> If random playback is activated, the Random symbol is shown in the status bar in front of the symbol for the folder, SD memory card or USB device.

#### Displaying metadata

There are two ways to display the name of the track in the display window:

- with the names stored in the metadata of the track
- with the file names

- **To select the SD/USB menu**: press the ▼ button and use the ◄ or ► button to select SD/USB and confirm with OK.
- **Using the ▼ button**, select **Display Metadata**.
- **Using the OK button**, switch **Display Metadata** function on or off. A tick in front of **Display Metadata** shows that tracks are displayed using metadata and not file names.

- **To exit the SD/USB menu**: press ◄.

#### Calling up information on the currently played track

**Normal Track Sequence**
- Random Tracks
- Random Folder
- Display Metadata

> **To select the SD/USB menu**: press the ▼ button and use the ◄ or ► button to select SD/USB and confirm with OK.

> **To select the track playback option**: press the ▼ button to select **Normal**
Press the \[ \] button. The display shows the folder name and track.

To exit the info menu: press the \[ \] button.

**Artist and album**

- Artists
- Album
- Track 04

To select the info menu: press the [\[ \]] button, select *Info* using the [\[ \]] or [\[ \]] buttons and confirm by pressing the [\[ \]] button. The display shows the artist, album and track.

To exit the info menu: press the [\[ \]] button.

Using the *media* button in Audio 10, select the SD/USB function.

Select the SD or USB display using the [\[ \]] or [\[ \]] button on the multifunction steering wheel. The track currently playing is shown on the display of the on-board computer.

Select the previous or next track using the [\[ \]] or [\[ \]] button on the multifunction steering wheel.

---

Operating the SD/USB function using the multifunction steering wheel

You can call up the previous or next track in the current folder using the multifunction steering wheel.

**WARNING**

If you operate information systems and communication equipment integrated in the vehicle while driving, you will be distracted from traffic conditions. You could also lose control of the vehicle. There is a risk of an accident.

Only operate the equipment when the traffic situation permits. If you are not sure that this is possible, park the vehicle paying attention to traffic conditions and operate the equipment when the vehicle is stationary.

Observe the legal requirements of the country in which you are currently driving.

Conditions

With Audio 10, you can use the following functions via Bluetooth®:

- make a phone call using a mobile phone
- play an audio file via an audio device

To use the Bluetooth® function of Audio 10, the following conditions need to be met:

- you need a mobile phone or device with Bluetooth®
- the mobile phone or Bluetooth® device must be located inside the vehicle in the vicinity of Audio 10
- the Bluetooth® function of Audio 10 is activated (> page 30)
- the Bluetooth® function of the mobile phone or audio device is activated
- the audio device must support the A2DP and AVRCP audio profiles

Information on the Bluetooth® mobile phones and devices recommended by Mercedes-Benz is available from qualified specialist workshops.

Activating/deactivating the Bluetooth® function

- **To select the system menu:** press the [SYS] button and press the [OK] button to confirm.
- **Press the [▼] button to select Activate Bluetooth.**
- Activate or deactivate the Bluetooth® function by pressing the [OK] button. A tick in front of the Activate Bluetooth message indicates that the Bluetooth® function is activated.
- **To exit the system menu:** press the [—] button.

The Bluetooth® function will remain switched on until you switch it off again. If you switch Audio 10 off, the existing Bluetooth® connection is disconnected. The call may be continued on the mobile phone. When switching on, Audio 10 automatically establishes the connection.

Telephone

Selecting the telephone function

- Press the [TEL] button.
- Or
- Press the [—] button.
**Pairing a mobile phone**

**What does pairing mean?**

When pairing, an authorized connection is established between Audio 10 and a mobile phone. Your mobile phone must be visible. Information on how to make your mobile phone visible can be found in the operating instructions of your mobile phone. If Audio 10 and your mobile phone are paired, they will connect automatically as soon as there is a Bluetooth® connection.

Audio 10 saves the pairing data of up to 10 mobile phones. If an additional mobile phone is coupled, Audio 10 overwrites the pairing data for the mobile phone that has not been connected to it for the longest period of time.

There are two ways of pairing:

- **Bluetooth® pairing**: Audio 10 searches for the mobile phone and starts the pairing process
- **Bluetooth® external**: the mobile phone searches for Audio 10 and starts the pairing process

**Pairing a mobile phone via Bluetooth®**

**To call up the telephone menu**: press the \( \text{\textleftarrow{}} \) button, select Telephone using the \( \text{\textuparrow{}} \) or \( \text{\textdownarrow{}} \) button and confirm by pressing the \( \text{\textperiodcentered} \) button. The **Connect Phones** menu item is selected.

**To start the search**: press the \( \text{\textperiodcentered} \) button.

The display shows the device list. The **Update** menu item is selected.

**To cancel the search**: press the \( \text{\textperiodcentered} \) button during the search.

If at least one mobile phone is found, the display shows the Bluetooth® name of the mobile phone.

If Audio 10 does not find a mobile phone, the **Search for Bluetooth devices failed** message is shown in the display.

**To search again**: select **Update** and press the \( \text{\textperiodcentered} \) button.

**To enter the passkey**: enter a four-digit, easy to remember number using the \( 0-9 \) buttons.
to [0-9] number keys and press the [OK] button to confirm.

Or

- Use the [◄] or [►] button to select 4 digits in the number bar, one after the other, and press the [OK] button to confirm.
- Use the [►] button to select OK and press the [OK] button to confirm.
  The mobile phone is authorized.
- Select Bluetooth® device name MB Bluetooth on the mobile phone.
- Enter the number previously selected on the mobile phone and confirm.
- Confirm possible prompts using the mobile phone.
  The Authorization successful message is shown in the display. You will see the Bluetooth® name of the mobile phone in the display/selection window.

When the Authorization failed message is displayed, you may have exceeded the prescribed time period. Repeat the procedure.

**Pairing a mobile phone externally via Bluetooth®**

- Press the [►] button.
  The display shows the menu for external authorization. The **External Authorization** menu item is selected.
- Press the [OK] button to confirm.
- Start the Bluetooth® scan process on the mobile phone.
- Select Bluetooth® device name MB Bluetooth on the mobile phone.
  A prompt appears in the display asking whether the mobile phone should be authorized.
- **To authorize:** press the [◄] button to select Yes and press the [OK] button to confirm.
  The mobile phone is authorized.
- **To enter the passkey:** enter a four-digit, easy to remember number using the [0-9] to [0-9] number keys and press the [OK] button to confirm.
  Or
- Use the [◄] or [►] button to select 4 digits in the number bar, one after the other, and press the [OK] button to confirm.
- Use the [►] button to select OK and press the [OK] button to confirm.
- Enter the number previously selected on the mobile phone and confirm.
- Confirm possible prompts using the mobile phone.
  The Authorization successful message is shown in the display. You will see the Bluetooth® name of the mobile phone in the display/selection window.

When the Authorization failed message is displayed, you may have exceeded the prescribed time period. Repeat the procedure.

**Automatic reconnection**

Audio 10 always searches for the last connected mobile phone.
If the last connected mobile phone cannot be connected, Audio 10 searches for the mobile phone that was connected prior to that.

**Connecting another mobile phone**

If you have authorized more than one mobile phone, you can switch between the individual phones.

ℹ️ You can only switch to another authorized phone if you are not currently making a call.

- **To call up the telephone menu:** press the [▼] button, select Telephone using the [◄] or [►] button and confirm by pressing the [OK] button. The Connect Phones menu item is selected.
  - Press the [OK] button. The display shows the device list.
  - Use the [▼] button to select the desired mobile phone and press the [OK] button to confirm. The selected mobile phone is searched for and connected to Audio 10.

ℹ️ Audio 10 can only be connected to one mobile phone at any one time. The connected phone is identified by the • dot.

**Displaying the Bluetooth® details of the mobile phone**

- **To call up the telephone menu:** press the [▼] button, select Telephone using the [◄] or [►] button and confirm by pressing the [OK] button. The Connect Phones menu item is selected.
  - Press the [OK] button. The display shows the device list.
  - Press the [▼] button to select the Details menu item and press the [OK] button to confirm. The display shows the following information on the selected mobile phone:
    - Bluetooth® name
    - Bluetooth® address
    - Authorization status
    - Availability
  - **To exit the detailed view:** press the [%] button.

**Unpairing a mobile phone**

- **To call up the telephone menu:** press the [▼] button, select Telephone using the [◄] or [►] button and confirm by pressing the [OK] button. The Connect Phones menu item is selected.
  - Press the [OK] button. The display shows the device list.
  - Press the [▼] button to select the Delete menu item and press the [OK] button to confirm. A prompt appears in the display asking whether you really wish to revoke authorization.
To unpair: use the ≤ or ≥ button to select Yes and press the OK button to confirm. The display briefly shows a message. The mobile phone is de-authorized and deleted from the device list.

To cancel the unpairing process: use the ≤ or ≥ button to select No and press the OK button to confirm. The mobile phone is not unpaired from Audio 10. You have canceled the process.

Using the telephone

Accepting and ending a call

When you receive a call, you will hear a ringtone via the Audio 10 loudspeakers. The phone number of the caller is shown in the display, if it is not withheld.

To accept a call: press the 6 button on the Audio 10 control panel or multifunction steering wheel.

Or

Select Accept by pressing the OK button. The call is played over the Audio 10 loudspeakers. Audio 10 mutes the active audio source.

Use the volume control to adjust the call volume, if desired.

To end a call: press the button on the Audio 10 control panel or multifunction steering wheel. Audio 10 plays the active audio source again.

Rejecting a call

Press the button on the Audio 10 control panel or on the multifunction steering wheel.

Or

Press the ≥ button to select Reject and press the OK button to confirm. Audio 10 plays the current audio source again.

Making a call

Entering a phone number using the number keys

Press the TEL button.

Enter the desired phone number using the 0 to 9 number keys and the * button.

Notes on the * button:

- to enter a star: press the * button once
- to enter a plus: press the * button twice within approx. 1.5 seconds

To delete individual digits: press the C button.

To delete the entire numerical sequence: press and hold the C button until the entire numerical sequence is deleted.

Or

Press the button.

To make a call: press the button on the Audio 10 control panel or multifunction steering wheel. This initiates dialing.

Entering a phone number using the character bar

You can also enter a phone number via the character bar in the display.
Press the TEL button.

Call up the character bar by pressing the ▼ button.

Press the ◄ or ► button to select the first digit and press the OK button to confirm.

Enter the rest of the phone number in the same way.

Press the ► button to select and press the OK button to confirm.

To delete individual digits: press the ◄ or ► button to select and press the OK button to confirm.

To delete the entire numerical sequence: press the ◄ or ► button to select and press and hold the OK button until the entire numerical sequence is deleted.

Or

Press the ◄ or ► button to select and press the OK button to confirm.

To make a call: press the ◄ or ► button to select and press the OK button to confirm. This initiates dialing.

Selecting a phone number from the telephone book

Press the TEL button.

Press the ► button to select Name and press the OK button to confirm.

To select a list entry with the arrow buttons: press the ▲ or ▼ button to select a list entry and press the OK button to confirm.

Or

To select a list entry with the number keys: select characters using the 2ABC to 9WXYZ number keys.

Notes on entering characters using number keys:

- press the button once: the first character on the button is selected
- press the button twice: the second character on the button is selected
- and so on

Press the ▼ button to select the desired party and press the OK button to confirm.

Or

Press the ▲ button. This initiates dialing.

Selecting a phone number from calls lists

Press the TEL button.

Press the ► button to select Call Lists and press the OK button to confirm.

Press the ▼ button to select the desired call list and press the OK button to confirm.

Press the ◄ or ▼ button to select the desired call list entry and press the OK button to confirm.

Or

Press the ▲ button. This initiates dialing.

Redials

Press the TEL button.

Press the ◄ button. The display shows the most recently dialed phone numbers.

Press the ▼ button to select the desired phone number and press the OK button to confirm.
Or

Press the [ ] button. This initiates dialing.

**Canceling dialing**

Press the [ ] button when dialing.

**Accepting/rejecting a waiting call**

If you receive an incoming call while already making a call, the display shows the call waiting display. You also hear a tone.

The call waiting function is only available if it is supported and has been activated by the mobile phone network provider.

To accept a call: press the [ ] button. Or

Select Accept by pressing the [ ] button. You are connected to the new party. The previous call is ended.

To reject a call: press the [ ] button. Or

Press the [ ] button to select Reject and press the [ ] button to confirm. The waiting call is rejected.

**Switching the hands-free system on/off**

You can switch the hands-free function on or off during a call.

When making a call, instead of Call Lists, the display shows Microphone Off or Microphone On in the menu bar.

Press the [ ] button.

To switch off: press the [ ] button to select Microphone Off and press the [ ] button to confirm. The The microphone is off. message appears briefly in the display.

To switch on: press the [ ] button to select Microphone On and press the [ ] to confirm. The The microphone is on. message appears briefly in the display.

**Setting the reception and transmission volume**

You can adjust the reception and transmission volumes of the call.

If reception and transmission volumes have been incorrectly set, call quality may be impaired.

Press the [ ] button.

To call up the telephone menu: press the [ ] button, select Telephone using the [ ] or [ ] button and confirm by pressing the [ ] button.

Press the [ ] button to select Adjust Volume and press the [ ] to confirm. The display shows the Adjust Volume menu.

Press the [ ] button to select Receive for reception volume or Send for transmission volume.

Set the desired volume with the [ ] or [ ] button. The long bar shows the current setting. The short bar shows the last volume saved.

To exit the telephone menu: press the [ ] button twice.
Loading the telephone book and call lists

You can load the telephone book and call lists of the mobile phone connected onto Audio 10.

▶ Press the **TEL** button.

▶ To call up the telephone menu: press the **▼** button, select Telephone using the ** retrofit or ** button and confirm by pressing the ** OK ** button.

▶ Press the **▼** button to select Import Contacts and press the ** OK ** button to confirm.

The display briefly shows a message.

▶ To exit the system menu: press the ** OK ** button.

Operating a mobile phone using the multifunction steering wheel

It is possible to accept, end and reject calls using the multifunction steering wheel. You can also make calls from your telephone book.

1. Phone book entry

▶ Select the telephone function on Audio 10 by pressing the ** TEL ** button.

▶ Press the ** retrofit or ** button on the multifunction steering wheel to select the ** TEL ** display.

▶ To accept a call: press the ** button.

▶ To end a call: press the ** button.

▶ To reject a call: press the ** button.

▶ To call up the telephone book: call up the telephone book on Audio 10 (▶ page 35).

Selecting the Bluetooth® audio function

1. Bluetooth® function display
2. Bluetooth® device status indicator
3. Media menu
4. Start and stop
5. BT audio menu
6. Track display

▶ Press the **MEDIA** button repeatedly until ** BT Audio ** is shown in the display.

Or

▶ To select using the media menu: press the **▼** button, select Media using the ** retrofit button and confirm by pressing the ** OK ** button.

The display shows the list of audio sources. The audio source currently playing is indicated by the ** dot.

▶ Press the **▼** button to select Bluetooth® device names and press the ** OK ** button to confirm.

The ** BT Audio ** message is shown in the display.

**Pairing/unpairing Bluetooth® devices**

**What does pairing mean?**

When pairing, an authorized connection is established between Audio 10 and an audio device. Your audio device must be visible. Information on how to make your audio device visible can be found in the operating instructions of your audio device.

Audio 10 saves the pairing data of up to 10 audio devices. If an additional audio device is coupled, Audio 10 overwrites the pairing data for the audio device that has not been connected to it for the longest period of time.

There are two ways of pairing:

- **Bluetooth® pairing**: Audio 10 searches for the audio device and starts the pairing process.
- **Bluetooth® external**: the audio device searches for Audio 10 and starts the pairing process.

If you pair a mobile phone as an audio device, it is automatically paired as a mobile phone as well, as long as your mobile phone supports this.

**Pairing a Bluetooth® device via Bluetooth®**

- **To call up the BT audio menu**: press the button, select **BT Audio** using the or button and confirm by pressing the button. The **Bluetooth Audio Device List** menu item is selected.
  - Press the button. The display shows the device list. The **Update** menu point is selected.
  - **To start the search**: press the button. Audio 10 searches for Bluetooth® devices within range for a certain period of time. The display briefly shows a message.

![Searching for BT Devices...](image)

![Cancel](image)

- **To cancel the search**: press the button during the search.

If at least one Bluetooth® device is found, the display shows the Bluetooth® name of the device.

If Audio 10 does not find a Bluetooth® device, the **Search for Bluetooth devices failed** message is shown in the display.

- **To search again**: select **Update** and press the button.
  - Press the button to select the desired Bluetooth® device and press the button to confirm. The display shows the input menu for the passkey.

![Please Enter Passkey:](image)

- **To enter the passkey**: enter a four-digit, easy to remember number using the button.
to number keys and press the button to confirm.

Or

Press the or button to select 4 digits, one after the other, and press the button to confirm.

Press the button to select OK and press the button to confirm.

Select Bluetooth® device name MB Bluetooth on the device.

Enter the number selected previously on the Bluetooth® device, and confirm.

Confirm possible prompts using the Bluetooth® device.

The Authorization successful message is shown in the display. You will see the Bluetooth® name of the Bluetooth® device in the display/selection window.

When the Authorization failed message is displayed, you may have exceeded the prescribed time period. Repeat the procedure.

Pairing Bluetooth® devices via Bluetooth®

Press the button. The display shows the menu for external authorization. The External Authorization menu item is selected.

Press the button to confirm.

Start the Bluetooth® scan process on the Bluetooth® device.

Select Bluetooth® device name MB Bluetooth on the device.

A prompt appears in the display asking whether the Bluetooth® device should be authorized.

To authorize: press the button to select Yes and press the button to confirm.

The Bluetooth® device is authorized.

To enter the passkey: enter a four-digit, easy to remember number using the number keys and press the button to confirm.

Or

Use the or button to select 4 digits in the number bar, one after the other, and press the button to confirm.

Use the button to select OK and press the button to confirm.

Enter the number selected previously on the Bluetooth® device, and confirm.

Confirm possible prompts using the Bluetooth® device.

The Authorization successful message is shown in the display. You will see the Bluetooth® name of the Bluetooth® device in the display/selection window.

When the Authorization failed message is displayed, you may have exceeded the prescribed time period. Repeat the procedure.

Automatic reconnection

Audio 10 always searches for the last connected Bluetooth® device.
If the last connected Bluetooth® device cannot be connected, Audio 10 searches for the Bluetooth® device that was connected prior to that.

**Connecting another Bluetooth® device**

If you have authorized more than one Bluetooth® device, you can switch between the devices.

- **To call up the BT audio menu:** press the [▼] button, select BT Audio using the [◄] or [►] button and confirm by pressing the [ok] button.
  - The Bluetooth Audio Device List menu item is selected.
  - Press the [ok] button.
  - The display shows the device list.
  - Press the [▼] button to select the desired Bluetooth® device and press the [ok] button to confirm.
  - The selected Bluetooth® device is searched for and connected to Audio 10.

ℹ Audio 10 can only be connected to one Bluetooth® device at any one time. The connected phone is identified by the ● dot.

**Displaying Bluetooth® details**

- **To call up the BT audio menu:** press the [▼] button, select BT Audio using the [◄] or [►] button and confirm by pressing the [ok] button.
  - The Bluetooth Audio Device List menu item is selected.
  - Press the [ok] button.
  - The display shows the device list.

► Press the [►] button.
> Press the [▼] button to select the Details menu item and press the [ok] button to confirm.
  - The display shows the following information on the selected Bluetooth® device:
    - Bluetooth® name
    - Bluetooth® address
    - Authorization status
    - Availability

► **To exit the detailed view:** press the [↔] button.

**Unpairing a Bluetooth® device**

- **To call up the BT audio menu:** press the [▼] button, select BT Audio using the [◄] or [►] button and confirm by pressing the [ok] button.
  - Bluetooth Audio Device List is selected.
  - Press the [ok] button.
  - The display shows the device list.
  - Press the [►] button.
  - Press the [▼] button to select Delete and press the [ok] button to confirm.
  - A prompt appears in the display asking whether the Bluetooth® device should definitely be de-authorized.
To unpair: press the ◄ or ► button to select Yes.
The display briefly shows a message. The mobile phone is de-authorized and deleted from the device list.

To cancel the unpairing process: use the ◄ or ► button to select No and press the OK button to confirm.
The mobile phone is not unpaired from Audio 10. You have canceled the process.

Placing an audio device

Press the MEDIA button repeatedly until BT Audio is shown in the display.
Or

To select using the media menu: press the ▼ button, select Media using the ► button and confirm by pressing the OK button.
The display shows the list of audio sources. The audio source currently playing is indicated by the ⋅ dot.

Press the ▼ button to select the Bluetooth® device name and press the OK button to confirm.
The BT Audio message is shown in the display.
Audio 10 plays your Bluetooth® device’s MP3 player via the loudspeakers.
Operation takes place via your Bluetooth® device.

Setting the volume

If you connect a Bluetooth® device to Audio 10, it is possible that the volume may need to be significantly increased. You can therefore select from two volume options:

<table>
<thead>
<tr>
<th>Volume option</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard</td>
<td>The external device is played back at a normal volume.</td>
</tr>
<tr>
<td>Boost</td>
<td>The external device is played back louder.</td>
</tr>
</tbody>
</table>

When the boost is switched on, traffic announcements may be played at a very loud volume. Adjust the volume of the traffic reports (page 20) or switch off the TA function (page 20).

To call up the BT audio menu: press the ▼ button, select BT Audio using the ◄ or ► button and confirm by pressing the OK button.

To call up the volume menu: press the ► button to select Volume and press the OK button to confirm.
The display shows the available settings: Standard and Boost. The current setting is indicated by the ⋅ dot.

Press the ▼ button to select the desired setting and press the OK button to confirm.

Operating the BT audio function using the multifunction steering wheel

You can call up the previous or next track in the current folder using the multifunction steering wheel.
Select the BT audio function on Audio 10 by pressing the \textit{MEDIA} button.

Using the \textit{U} or \textit{V} button on the multifunction steering wheel, select the BT display. The track currently playing is shown on the display of the on-board computer.

Call up the previous or next track using the \textit{\textup{\textbullet}} or \textit{\textdown{\textbullet}} button on the multifunction steering wheel.

**WARNING**
Handling discs while driving may distract you from traffic conditions. You could also lose control of the vehicle. There is a risk of an accident.
Handle discs only when the vehicle is stationary.

**Connecting an external device**

You can connect an external device to Audio 10 and play it back via the speakers. The AUX jack intended for this purpose (3.5 mm stereo audio jack) is located in the stowage compartment on the driver’s side of the dashboard.

- Connect an external device to the AUX jack.
- An adapter cable is required for the AUX jack.
- If you connect an external device, Audio 10 does not automatically switch over to the AUX function.

**Selecting the AUX function**

- Press the MEDIA button repeatedly until the display shows AUX.

If you are in one of the SD, USB or BT Audio audio sources, you can call up the AUX function using the Media menu.

**Setting the volume**

If you connect an external device to Audio 10 via its headphones jack, the volume may have to be increased significantly. You can therefore select from two volume options:

<table>
<thead>
<tr>
<th>Volume option</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard</td>
<td>The external device is played back at a normal volume.</td>
</tr>
<tr>
<td>Boost</td>
<td>The external device is played back louder.</td>
</tr>
</tbody>
</table>

- When the boost is switched on, traffic announcements may be played at a very loud volume. Adjust the volume of the traffic reports (page 20) or switch off the TA function (page 20).
- To call up the volume menu: press the V button, select Volume using...
the ▲ button and press the ▼ button to confirm.

The display shows the available settings: **Standard** and **Boost**. The • dot indicates the current setting.

- Select the desired setting using the ▼ button and press the ▼ button to confirm.
Requirements for SD memory cards/USB devices ......................... 48

### Requirements for SD memory cards/USB devices

**SD memory cards**

<table>
<thead>
<tr>
<th>Model</th>
<th>SD, SDHC</th>
</tr>
</thead>
<tbody>
<tr>
<td>Capacity</td>
<td>32 GB</td>
</tr>
<tr>
<td>Format</td>
<td>FAT/FAT32</td>
</tr>
</tbody>
</table>

SD memory cards are available in many different sizes. Therefore, it cannot be guaranteed that playback is possible with every SD memory card.

**USB devices**

The following USB devices are supported:
- USB sticks
- USB hard drives
- certain MP3 players

<table>
<thead>
<tr>
<th>Model</th>
<th>USB 2.0</th>
</tr>
</thead>
<tbody>
<tr>
<td>Format</td>
<td>FAT/FAT32, maximum of 4 primary partitions</td>
</tr>
<tr>
<td>Hard drive size</td>
<td>2.54 cm (1 in)</td>
</tr>
<tr>
<td></td>
<td>4.57 cm (1.8 in)</td>
</tr>
<tr>
<td></td>
<td>6.35 cm (2.5 in)</td>
</tr>
<tr>
<td>Hard drive: start-up/permanent current, max. (with separate power supply, if necessary)</td>
<td>800 mA</td>
</tr>
</tbody>
</table>

USB devices are available in many different sizes. Therefore, it cannot be guaranteed that playback is possible with every USB device.

- Do not use a USB extension cable.
- Do not use a spiral cable for the USB port.

### Supported file formats

<table>
<thead>
<tr>
<th>SD memory card/USB device</th>
<th>MP3, AAC, WMA, WAV, MP4, M4A, M4B (maximum 2 channels)</th>
</tr>
</thead>
<tbody>
<tr>
<td>BT Audio</td>
<td>SBC, MP3</td>
</tr>
</tbody>
</table>

To shorten the initialization period, only load music files onto the USB device, if possible.

Unsupported file formats are not displayed.

Audio 10 does not support any DRM (Digital Rights Management) coded files.

### SD memory card/USB device file structure

<table>
<thead>
<tr>
<th>Maximum number of folders per directory</th>
<th>200</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum number of tracks per directory</td>
<td>500</td>
</tr>
<tr>
<td>Maximum number of tracks in &quot;Random tracks&quot; random playback</td>
<td>300</td>
</tr>
</tbody>
</table>
